

BEST

Managers

Introduction

Effective management comes from the top down and the bottom up. As managers of people in high hazard industries, you have the responsibility to ensure your teams understand the environmental consequences of their activities. It is also your responsibility to ensure that the company operates in a way that protects the environment. But how confident are you in your knowledge of the regulations and requirements that govern your business activities? Do you understand your liabilities and the consequences for you and your business if you cannot demonstrate effective environmental management? This course brings together technical knowledge and practical examples to support your business goals.

Aim

The aim of this course is to provide delegates with managerial or supervisory responsibilities for environmental issues with relevant and useful information to assist in the performance of their assigned roles and teams.

The BEST Managers course is designed to be both informative and interactive and includes the use of group discussions and short break out exercises.

Course Content

- Moral, Legal and Financial Obligations
- Who is responsible for environmental management?
- Goal Setting and the EMS
- Legislative Overview and the Role of the Regulator
- Environmental Aspects & Impacts
- Good Practice Examples and Opportunities for Improvement

Expected Course Outcomes:

On completion of the course delegates will:

- Understand the main environmental challenges facing the oil and gas industry
- Appreciate the regulatory and permitting issues to which operators are subject
- Increase personal knowledge of formal/regulatory inspections and reporting mechanisms
- Improve personal efficiency when assisting with the management of company environmental goals and targets

Suitable for: Supervisors, team leaders and managers who have responsibility for environmental management issues.
