

BEST

Basic Environmental Skills Training

Introduction

Effective management of the environment is essential to any organisation. High hazard industries have voluntarily taken on environmental representatives, or E-Reps, to support this goal at the work site. The BEST course was designed to provide E-Reps and new entrants in to environmental positions, with the technical and practical skills, knowledge and tools to fulfil their role in improving environmental performance through workforce engagement.

Aim

The aim of this course is to provide our delegates with relevant and practical information to assist in the performance of their assigned roles.

The BEST sessions have been designed to be both informative and interactive. You will take part in whole group and breakout session discussions. Exercises are followed by whole group feedback on specific environmental topics.

Course Content

Day 1:

- The environmental challenge
- Response of industry to the challenge
- Environmental legislation overview
- The role of the E-Rep
- Environmental aspects & impacts

Day 2:

- BEIS presentation
- Environmental good practice
- The E-Reps 'Toolbox'
- Environmental Inspection exercise

Expected Course Outcomes:

You will be able to:

- Understand the role of an environmental representative
- Assist in the identification management of environmental goals & targets
- Understand the assessment of risk in terms of Aspects & Impacts
- Understand key environmental legislative requirements
- Utilise key tools to assist in decision making
- Identify good environmental practice
- Appreciate what is required/needed in terms of effective environmental inspections

Suitable for: All levels of workforce, E-Reps and supervisors with responsibility for environmental management and new environmental entrants to the oil and gas industry.

Prior Knowledge/Training: None required - detailed course notes will be provided.

Course Duration: 2 days
